

prefLabel [1]	definition [2]	altLabels [3]	hiddenLabels [4]	examples [5]	scopeNotes [6]	notes [7]	ConceptScheme [8]	to the CCR coordinator [9]	from the CCR coordinator [10]
bit rate	The number of bits that are conveyed or processed per unit of time. ( <a href="https://en.wikipedia.org/w/index.php?title=Bit_rate&amp;oldid=831277980">https://en.wikipedia.org/w/index.php?title=Bit_rate&amp;oldid=831277980</a> )	bitrate		for a wave file: bit depth * sample rate (e.g. standard stereo recording on cd: 44100 Hz * 16 bit * 2 channels = 1411200 bits/sec)	Used within the fields of telecommunications, computing and digital media				

[1] MANDATORY: the one and only preferred english label to be used for this concept.

NOTE: can also be used for alternative spelling, e.g., organiZation vs organiSation.

[2] MANDATORY: the one and only definition for this concept

[3] OPTIONAL: zero or more alternative english labels for this concept

Each altLabel should be separated by a double pipe (||)

[4] OPTIONAL: zero or more wrong, e.g., containing common typos, english labels for this concept.

Each hiddenLabel should be separated by a double pipe (||)

[5] OPTIONAL: zero or more english examples for this concept.

NOTE: an example might contain non-english, but an english translation should than be available.

NOTE: examples can also be negative, i.e., a counter example of what this concept is not.

Each example should be separated by a double pipe (||)

[6] OPTIONAL: zero or more english notes that supply some, possibly partial, information about the intended meaning of the concept.

Each scopeNote should be separated by a double pipe (||)

[7] OPTIONAL: zero or more english notes.

NOTE: notes on the intended meaning of the concept should become scopeNotes.

NOTE: notes on changes of the definition or other parts of the concept specification should become historyNotes. These can only be created by the CCR coordinators.

Each note should be separated by a double pipe (||)

[8] OPTIONAL: to which ConceptScheme (see <http://www.clarin.eu/conceptregistry> for the current set), i.e., which domain, should the concept belong. The default ConceptScheme is metadata.

[9] OPTIONAL: If needed put some info for the CCR coordinator here, e.g., why couldn't you use an existing concept.

[10] type here

OPTIONAL: If needed the CCR coordinator can put a reply to the submitter.
